## PROJECTS

**FinFlex** | 🐙 Github Feb 2026 - Mar 2026  
*Full Stack developer*

- Built an AI-powered personal finance platform using **React, TypeScript, Express, Supabase/PostgreSQL, and Gemini** for financial tracking and personalized insights.
- Developed a **Telegram expense-tracking agent** that converts natural-language messages into structured transactions and syncs them with the finance dashboard.
- Implemented interactive financial dashboards and AI-driven insights to help users **track spending and understand financial patterns**.

**Technologies / Tools Used** : React, TypeScript, Tailwind CSS, Express, PostgreSQL, Telegram-Bot

**VIDHYA** | 🐙 Github Aug 2025 - Sep 2025  
*ML / Full-Stack Developer · 2026*

- Built an **early-warning system** that combines student attendance, test scores, and fee data to identify students at risk of failing before examination results.
- Developed an **ML-based risk assessment system** with colour-coded alerts to help educators prioritize at-risk students and intervene early.
- Implemented a centralized dashboard with **automated notifications to mentors and guardians**, enabling timely intervention and reducing manual monitoring.

**Technologies / Tools Used** : Python, Flask, Scikit-learn, Pandas, Git, MERN Stack

## SKILLS

|                                     |                                            |
|-------------------------------------|--------------------------------------------|
| <b>Programming Languages :</b>      | C++, Python, JavaScript, SQL               |
| <b>Frameworks &amp; Libraries :</b> | React, FastAPI, FastMCP, Node.js           |
| <b>Tools &amp; Platforms :</b>      | Git, GitHub, Docker, Linux, MCP, AI Agents |
| <b>Databases :</b>                  | PostgreSQL, Supabase, Firebase             |
| <b>Soft Skills :</b>                | Decision Making, Teamwork, Adaptability    |
